

Project Title

Establishment of A One Stop Shop – Phase II
“Infrastructure and Functioning”

Project Type

Economic Development/Social Cohesion

Project Location

Rrashbull

Total Pre-Estimated Budget

52,000 Euro

Project Background and Analysis

Rrashbull administrative unit has the highest number of economic operators registered in its territory (after Durres). Having this situation, the need to raise a necessary supportive infrastructure for the business services was identified, more concretely a service centre to serve as a One Stop Shop. Initially all necessary services could be offered to businesses, services that are offered by the local government (possibly by the central government as well).

At a second phase, private businesses could be established as well, such as accounting service, logistics, legal services etc. This would improve and fulfill the service package for the active businesses in Rrashbull.

Specific Objectives of the Project

The goal of the project is improvement of standards and quality of service provision for the business. This follows the first phase that is the assessment (look at fiche 10).

Expected Results and Project Indicators

The expected results include:

- (a) increased number of services provided to businesses and improvement of their standards;
- (b) increased efficiency and impact of these businesses on the region.

Provision of supportive services (bank, legal etc.) in the One Stop Shop will directly affect the improvement of service provision to the active businesses in Rrashbull and 6,652 inhabitants of this area.

Project Activities

The approximate duration for the implementation of the project is 12 months, with some year prolongation.

The foreseen activities include:

- a) identification and preparation of offices;
- b) establishment of the office for supportive services (legal, financial ones etc.) for the one stop shop,
- c) employment of experts;
- d) service provision.

Project Maturity

After the first five years, the One Stop Shop will have its own revenues from service selling to private companies.

Financial Resources and Implementation Partners

The potential finance source is support with donations during the first 5 years and then gradually private business funds.

The potential partners in the implementation of this project include private businesses, Chamber of Commerce and Industry, etc.

Project Cost

The project cost is calculated to be around 52,000 Euro for investments in offices, equipment and human resources for a year.
